

Adobe Premiere Pro CS3: Basic Video Editing

Course Length: 2.0 day

Course Description

You have probably shot video with a digital video camera, and maybe recorded audio clips. However, you now need to put the video, audio, and still images together and create a video program. In this course, you will use Adobe® Premiere Pro CS3 to create a video project.

Course Objective:

You will create a video program that combines video, audio, and still images, using Adobe Premiere Pro.

Target Delegate:

This course is designed for delegates who need to edit video clips and create digital movies, but have little or no experience using Premiere Pro or for delegates who want to edit video more quickly, integrate video with other Adobe products, and work in a digital format that can be repurposed for multiple uses. They may have experience using graphic design and illustration programs, such as page layout, photo editing, or illustration programs, but probably do not have experience using other video editing applications.

Prerequisites:

Before taking this course, delegates should be familiar with the basic functions, such as creating folders, launching programs, and working with windows, of their computer's operating system. They should also have the basic Windows application skills, such as copying and pasting objects, formatting text, saving files etc.

Performance-Based Objectives

Upon successful completion of this course, Delegates will be able to:

- assemble a sequence of media clips.
- edit a sequence.
- enhance a sequence with transitions, effects, titles, and composites.
- work with audio.
- capture media.
- export a video.

Adobe Premiere Pro CS3: Basic Video Editing

Course Length: 2.0 day

Course Content

Lesson 1: Assembling a Project

Topic 1A: Familiarize with Premiere Pro

Topic 1B: Create a Project

Topic 1C: Customize the Workspace

Topic 1D: Organize Media Files

Topic 1E: Add Clips to a Sequence

Lesson 2: Editing a Sequence

Topic 2A: Edit Footage

Topic 2B: Trim Clips

Topic 2C: Edit Clips

Topic 2D: Adjust Clips

Lesson 3: Enhancing a Sequence

Topic 3A: Add Transitions

Topic 3B: Apply Effects

Topic 3C: Add a Title

Topic 3D: Create a Composite

Lesson 4: Working with Audio

Topic 4A: Adjust Audio

Topic 4B: Apply Audio Effects

Topic 4C: Map Source Channels

Lesson 5: Capturing Media

Topic 5A: Capture Video Manually

Topic 5B: Capture Video Using the Device Transport Controls

Topic 5C: Perform a Batch Capture

Lesson 6: Exporting Video

Topic 6A: Export a Movie File

Topic 6B: Export a Video for the Web

Topic 6C: Export a Video to a Mobile Device
